

JEEVANAND R

AWS Cloud Engineer | DevOps | Linux Administration | Site Reliability

Bengaluru, India | [+91 9632080135] | [rjeevanand9632@gmail.com] | [www.linkedin.com/in/jeevanand-r-2001]

AWS Cloud Engineer with **2 years of experience** designing, automating, and supporting enterprise cloud infrastructure. Strong foundation in **AWS, Terraform**, Linux administration, and cloud automation, complemented by hands-on exposure to **Docker, Kubernetes**, and **Amazon EKS**. Committed to continuous learning and leveraging DevOps practices and AI-powered automation to build scalable, secure, and reliable cloud platforms.

PROFESSIONAL SUMMARY

- **Cloud Engineering:** Experienced in provisioning, administering, and optimizing AWS infrastructure across enterprise production and non-production environments using EC2, VPC, IAM, Route 53, RDS, ALB, and CloudWatch.
- **Infrastructure Automation:** Hands-on experience implementing Infrastructure as Code using Terraform and CloudFormation, along with Bash, AWS CLI, Lambda, and EventBridge to automate deployments, operational tasks, and cloud cost optimization.
- **Containers & Cloud Native:** Basic hands-on experience with Docker, Kubernetes, Amazon EKS, and Red Hat OpenShift (ROSA) through infrastructure setup and Proof of Concept deployments.
- **Production Operations:** Experienced in production monitoring, incident management, Root Cause Analysis (RCA), OS patching, middleware administration, and maintaining high availability for enterprise banking workloads.
- **Cloud Security:** Knowledge of IAM, AWS Config, GuardDuty, AWS WAF, Network Firewall, Active Directory, Azure Active Directory, and security best practices for enterprise cloud environments.
- **Continuous Learning:** AWS Certified Cloud Practitioner with Microsoft Azure Fundamentals, Azure AI Fundamentals, GitHub Foundations, and GitHub Copilot certifications. Actively enhancing expertise in DevOps, Platform Engineering, Kubernetes, and AI-powered cloud automation.

TECHNICAL SKILLS

Cloud (AWS)	EC2, VPC, IAM, S3, RDS, Lambda, CloudWatch, Route 53, ACM, WAF, Network Firewall, SNS, EventBridge, CloudTrail, AWS Backup, ECR
Infrastructure as Code	Terraform
Containers & Orchestration	Docker, Kubernetes, Amazon EKS, Red Hat OpenShift (ROSA), Podman
Operating Systems	RHEL 8/9, Amazon Linux, Ubuntu, Windows Server, Linux Administration
Networking	VPC, Subnets, Route Tables, NAT Gateway, ALB, NLB, Security Groups, NACLs, VPC Endpoints, DNS, TCP/IP
Automation & Scripting	Bash, Shell Scripting, Python (Basic), AWS CLI, Git, GitHub
Monitoring & Observability	CloudWatch, CloudTrail, Incident Management, Root Cause Analysis (RCA)
Security & Identity	IAM (Users, Groups, Roles, Policies), AWS WAF, Active Directory, SSL/TLS
AI & Automation	Azure OpenAI, FastAPI, RAG, Vector Databases, Streamlit

EXPERIENCE

Tata Consultancy Services	Aug 2024 – Present
Cloud Administration Engineer	Jul 2025 – Present
Promoted to drive the end-to-end administration and automation of mission-critical AWS cloud environments for Tier-1 banking clients. Spearheaded the transition from manual provisioning to Infrastructure as Code (IaC) workflows, while integrating proactive, AI-assisted monitoring solutions. Recognized by leadership for driving operational excellence, reducing manual overhead, and maintaining strict compliance across highly secure, three-tier enterprise architectures.	

Key Responsibilities

- Own end-to-end AWS infrastructure administration for enterprise banking applications, ensuring high availability, security, and SLA compliance across production and non-production environments.
- Design and implement secure three-tier AWS architectures using public/private subnets, NAT Gateway, and Application Load Balancers.
- Provision and manage core AWS infrastructure (EC2, VPC, IAM, Route 53, RDS, S3, ALB, Security Groups, NACLs) using Terraform to standardize deployments and improve consistency across environments.
- Lead automation initiatives using Bash, AWS CLI, Lambda, and EventBridge to reduce manual operational work and streamline recurring infrastructure workflows.
- Build and maintain proactive CloudWatch monitoring, alerting, and CloudTrail logging to detect infrastructure issues early and reduce production risk.
- Manage IAM users, groups, roles, and policies to enforce least-privilege access; configure AWS WAF and Network Firewall rules, and support Active Directory-based authentication.
- Own root cause analysis and change coordination for production incidents and support Amazon EKS, OpenShift, and ROSA Proof-of-Concept deployments.

Cloud Support Engineer

Aug 2024 – Jul 2025

Key Responsibilities

- Provided production support for AWS infrastructure powering enterprise banking applications, monitoring system health and responding to incidents within SLA.
- Performed Linux (RHEL, Amazon Linux, Ubuntu) and Windows Server OS upgrades, patching, and routine maintenance across production and non-production environments.
- Investigated and triaged production incidents through log review and root cause analysis, escalating and coordinating fixes with senior engineers.
- Monitored infrastructure health using CloudWatch and CloudTrail, and provided first-line troubleshooting support for EC2, VPC, RDS, and S3-based workloads.
- Assisted with Active Directory-based authentication support and handled routine IAM access requests for enterprise users.

PROJECTS

Flood Relief Supplies Coordinator

Built a cloud-native flood relief resource management platform using **AWS**, **Terraform**, **Docker**, and **Amazon EKS**. Automated infrastructure provisioning with Terraform, deployed containerized workloads on Kubernetes, configured **Amazon RDS** for persistent storage, and exposed the application through an **Application Load Balancer** to ensure scalability and high availability.

CERTIFICATIONS

• AWS Certified Cloud Practitioner	Amazon Web Services
• Microsoft Certified: Azure Fundamentals (AZ-900)	Microsoft
• GitHub Foundations	GitHub
• GitHub Copilot Certification	GitHub
• AWS Certified Solutions Architect - Associate – In progress	Amazon Web Services

EDUCATION

B.Tech in Artificial Intelligence and Data Science
Sri Krishna College of Engineering and Technology

2024
